Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed generally changes to claims to read over Schwender (5,535,461)102 rejection, applicant should be careful about limitations that refer to the thickness and planar top surface of the base to be sure they are supported by the specification. Saylor (5308670) is closer to the disclosed invention and differs only in that it has four raised sides rather than just two. It would have been obvious to modify Saylor to eliminate two opposed sides so that two opposed raised sides remain. There is no suggestion that the examiner can make that would overcome the rejection involving Saylor to place the case in allowable condition .
